Class summary. These writing classes are founded on the concepts **taught in the Institute for Excellence in Writing (IEW) program by Andrew Pudewa**. The IEW program teaches structure and style: *structure* to develop organizational skills, and *style* to allow for individuality and creativity. The high-interest source materials for these classes have been chosen to launch the imagination and enthusiasm of elementary, middle school, and high school students. *Grade-appropriate source materials are provided.*

In the **intro and elementary** classes, writing during the class period is typically limited to crafting keyword outlines, brainstorming applicable descriptive details, and working through periodic worksheets to support new stylistic or structural elements. **Intermediate** students can expect to do more in-class writing toward the end of the year, and **advanced** students will write during class more frequently. Occasionally, all students have the opportunity to read aloud from their compositions. The last week of each semester is usually reserved for an engaging and constructive review activity.

Mummies and Dragons and Knights — Oh, My!

This year, the intro, elementary, and intermediate classes will be writing on some unusual and fascinating topics drawn from ancient and medieval history. We'll also craft some of our own versions of familiar stories. The advanced class will explore a similar but wider range of subject-matter.

Although these writing classes may use literature as a springboard for various lessons and will regularly address practical grammar and usage, none is designed to function as or replace a literature or grammar course.

Note that there is a bit of overlap in the targeted grade span of each class. If you have a 4th grader or 6th grader, for example, you can enroll him down or up depending on experience or confidence level. Please ask if you need assistance determining the most appropriate class for your child, especially with regard to the advanced class.
